Go Sustainable! Start Walking!

Walking is often the quickest and most direct way to travel around campus. Once you know your way, it’s much quicker to walk rather than driving and trying to find parking. It also helps you discover new and unique places on campus and admire the greenery and architecture.

Another great benefit of walking is the health impact. It keeps you energized and serves as an exercise while letting you interact with people.

Plus, getting around on foot drastically reduces your carbon footprint as less reliance on motor-vehicles reduces the emission of greenhouse gases.

These are some of the common and easy routes marked on the map. Use these routes daily with friends to exercise and enjoy the greenery all over campus!
Using the grid below, find the intersection between your starting point and destination to locate the average walking time in minutes.
